School of Artificial Intelligence

CONTENTS

1. Problem Statement
2. Literature Review
3. Objectives of the project
4. Proposed Methodology
5. Tools and Technologies
6. Experimental setup
7. Results
8. Challenges
9. Conclusions & Future scope
10. References

Problem Statement (Font size 24)

Describe the engineering problem

Explain why it is important

Mention real-world applications, statistics, etc.

Literature Review (Font size 24)

Paper / System 1 – Method – Limitation

Paper / System 2 – Method – Limitation

Paper / System 3 – Method – Limitation

Objective of the Project (Font size 24)

- Objective 1
- Objective 2
- Objective 3

Proposed Methodology (Font size 24)

Explain the proposed solution

Include system architecture or block diagram

Describe working principle

Step 1 – Data collection

Step 2 – Preprocessing

Step 3 – Model / System development

Step 4 – Testing and evaluation

Tools & Technologies (Font size 24)

Software: Python / MATLAB / TensorFlow

Hardware: Arduino / Raspberry Pi / Sensors

Other tools used in the project

Experimental Setup (Font size 24)

Dataset description

Number of samples

Hardware / simulation environment

Results (Font size 24)

Initial results

Graphs or performance metrics

Prototype images (if available)

Challenges (Font size 24)

Technical issues faced

Dataset limitations

Hardware or integration problems

Conclusions & Future scope (Font size 24)

- Summary of work completed
- Expected outcome or impact
- Tasks remaining before final evaluation
- Improvements planned
